## OBJECTIVE

Pursuing a Software Developer Internship to gain hands-on experience in software development, where I can contribute my skills, learn from experienced professionals, and expand my knowledge of the industry.

## HIGHLIGHTS OF QUALIFICATIONS

- Knowledge of modern web technologies and web development.
- Systematic problem-solving skills for tackling complex issues.
- Familiar with agile processes and working on a scrum team.
- Thorough understanding of software testing and debugging processes for the Software Testing Life Cycle.
- Analyzed problems into modular components and designed algorithms, data structures based on object-oriented programming (OOP) concepts.
- Represent information with relational database model and manipulate data with interactive query language.

## TECHNICAL SKILLS

<b>Programming Languages</b>	C, C++
<b>Database Management</b>	Oracle 12C
<b>Design and IDE Tools</b>	MS Office, MS Visual Studio
<b>Operating Systems</b>	Windows, Linux, Mac
<b>Web Development</b>	JavaScript, HTML, CSS, NodeJS, Express
<b>Tools</b>	Visual Studio, VS Code, GitHub

## EDUCATION

**Computer Programming & Analysis**  
**Seneca College, North York, ON**

Jan. 2023 - Present

**Civil Engineering Technology**  
**Seneca College, North York, ON**

Sep. 2016 – Apr. 2019

## PROJECTS

**My Personal Website:** <https://minh-webpage.vercel.app/>

- Designed to showcasing my web development projects along with my resume.
- Utilized Html, CSS and JavaScript to create this website.
- Is maintained and updated regularly to reflect my latest skills.

**Habit Tracker:** <https://habit-tracker-minh.vercel.app/>

- Designed to help users track their existing habits or new habits they want to implement in their life. The app will also save and display your progress of the current week.
- The logic for the app, especially the time which is the most important part of a habit tracker was implemented in JavaScript.
- The app used local storage to save data so that users can keep track of their progress on their personal devices.

**Other projects on my GitHub:** <https://github.com/trihuynh0503>

- Display all the codes and files I used to create my personal website, web apps, and academic projects.

## EXPERIENCE

**Civil Engineering Technologist**

May 2019 – Mar. 2022

**Thurber Engineering, Oakville, ON**

- Carried out various lab testing on soils and concrete.
- Provided construction inspection and quality control/assurance testing for various infrastructure and transportation projects on site.
- Communicated with client and contractors to ensure the field test were carried out smoothly without impeding contractor workflow.
- Communicated effectively to clients, contractors and project engineers about the test results in verbal and in written formats.
- Worked long hours when required.
- Worked in various weather conditions, including hot temperatures and cold/freezing conditions.
- Some notable projects I've worked for:
  - o St. Lawrence Market North Building
  - o Highway 401 Expansion
  - o Union Station Rail Corridor
  - o Weston & Malton GO Station
  - o Ashbridge Bay Treatment Plant
